"Context Management Super Tools and Filter/Sort Model

for Aggregated-Display Web Pages"

ABSTRACT OF THE DISCLOSURE

[0076]   An information aggregation and management system and method having

5   selective "drill-down" capabilities and employing an Object-Action Navigation

methodology. A user first selects an object of interest, and then selects one or more

actions to perform on said selected object. An informational object may be selected

from a Context Pane, and then an available action for that object may be selected from

execution. A Content Pane displays the results of the actions on the object or objects.

10   The user may rearrange, summarize, maximize, filter and sort information for display

to effectively manage display area and minimize operations necessary to obtain

information and analysis of interest.
